Each Mosaic sample-board is approximately one square-foot. Images are for illustrative purposes only. Actual size of face-mounted sheets will differ from the sample boards shown. Due to the nature of hand-molded tiles, all sizes/measurements are approximations. Color & shade variation are inherent in our product. Cracking &/or cracking may happen before, or after installation.

CALIFORNIA ART TILE
MOROCCAN-STYLE MOSAICS
Face-mounted Ceramics

Sold by the sheet <> in stock CA <> F.O.B. San Diego 92121

Due to the nature of hand-molded tiles, all sizes/measurements are approximations. Color & shade variation are inherent in our product. Crazeing &/or crackling may happen before, or after installation.

As we cannot control installation, California Art Tile does not recommend MOROCCAN-STYLE MOSAICS for floors. If client desires floor use of product, please note that we create our mosaics with a clean(sharp) edge. It is important to ensure that the edges lay flat and no edge is slanted upward. Raised edges may catch foot traffic.

In order to blend the mosaic sheets and maintain uniformity during installation, the face-mount sheet must be periodically cut to move/rearrange the mosaic pieces. As an example, go to CAArtTile.net to view our installation videos: *Circles Mosaics and Hex Mosaics*.

*Grout: Due to its tight grout-joint, we recommend *unsanded grout* on all MOROCCAN-STYLE MOSAICS. For example, the Presidio sample-board (page 1), shows unsanded grout used on the "Presidio" MOROCCAN-STYLE MOSAIC and *sanded grout* used on the "1 x 3 Running Bond".

Peruse the information on our website. From our Home Page: Product Info > Product Facts, Product Info > Installing Mosaics and view videos there. Client should purchase samples before final product selection.
